

What if you could talk to your safety system the way you talk to your team?

What if asking for safety insights was as simple as asking a question?

What if reporting became effortless and intuitive?

Introducing

Quadrant SOAR (Self-Operated Analytical Reporting)

Quadrant SOAR Revolutionizes how business users interact with safety data. Powered by advanced **natural language functionality**, it allows users to query the safety database **directly using business language**—no technical expertise required! Simply type your question, and Quadrant retrieves

DATA SECURITY AT THE CORE

Your data remains in your safety database, ensuring you stay in complete control.

AUDIT AND LOGGING

Every query is logged, providing full traceability for compliance and insights.

EXPLAINABILITY

Quadrant offers clear explanations of how results are retrieved, helping users refine their queries effectively.

SEAMLESS INTEGRATION

Use insights effortlessly across other Quadrant modules, including:

- Quality Review
- Medical Review
- Late Log Analysis
- CAPA and Deviation Management

Vitrana

QUADRANT SOAR IS MORE THAN A FEATURE

it's a game-changer. It democratizes access to data, empowering business users to act independently, make faster decisions, and focus on driving meaningful business outcomes.

**Ready to let
your data soar?**

Let's connect to learn how Quadrant SOAR can transform your safety reporting experience!
